

Sustainable Project Evaluation (2016-2024) in Janitzio, Michoacán, Mexico.

Author : Ing. Itzel López Florentino¹
Mentor: Dr. Rubén Martínez Cárdenas²

INTRODUCTION

- Programs in Mexico seek sustainability, inclusion, and social equity in indigenous communities as a response to local needs.
- This study evaluates 7 INPI projects in Janitzio (2016-2024), identifying challenges in the relationship between authorities, institutions, and the community.
- Problems persist in design, bureaucratic management, administration, and monitoring.
- The inefficiency of programs motivated the search for solidary endogenous solutions. The cooperative's goal is to ensure the active participation of 90% of the artisans and reach an internal trust index of 4-5 in 24 months.

CONTEXT

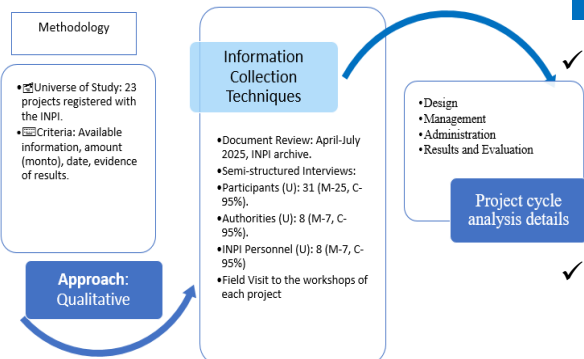

- Location: Lago de Pátzcuaro, in the state of Michoacán, Mexico.
- Population: 2,352 (1,132 Men / 1,220 Women), (INEGI, 2020).
- Culture: Purépecha.
- Government: Based on customs and traditions (Since 2021).

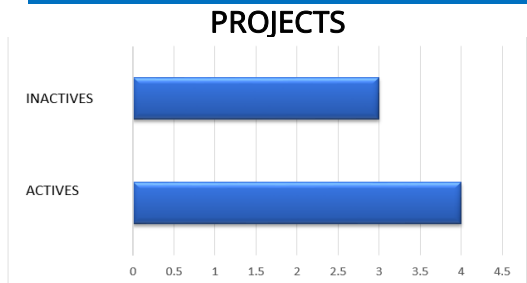

OBJETIVE

To analyze the dynamics among authorities, institutions, and the community in the design, management, and administration of sustainable projects (2016-2024) and their effect on the conformation of an indigenous women's cooperative in Janitzio.

METHODOLOGY

RESULTS

- (D) Lack of diagnostics.
- (G) Bureaucracy > 12 months..
- (A) Diffuse roles..
- Disconnection between achievements/objectives.
- Little/No evaluation.

INSTITUTIONS/AUTHORITY

Activity	Authorities	Institutions	Percentage (A + I / 8)
	Participants	Participants	
Project Design.	2	2	50%
Management Process	2	2	50%
Accompaniment in Operations	2	2	50%
Final Results Evaluation	0	2	25%

SOCIAL CAPITAL

- Strengthening of networks
- Increase in trust among actors
- Extended alliances.

DISCUSSION AND CONCLUSIONS

- Unequal relationships, which implies the design of regulatory frameworks that promote equitable participation.
- To strengthen local participation, it is necessary to create permanent intersectoral working tables.
- In diagnostics and monitoring, implement the mandatory nature of participatory diagnostics and include technical monitoring systems.
- Finally, mandatory training and formation in all programs.
